

Art

At Stephen Freeman Primary School, pupils from Reception to Year 6 will experience a wide range of media and will build on their skills each year including drawing, painting, collage, 3D, printing, textiles and ICT.

From Year 1 upwards, pupils are encouraged to work in a project type format for their art work. This includes being introduced to an artist or a style of artwork, learning and practicing a new skill and planning their response and how they want to incorporate their new learning. From their plans they can select which they want to take forward to a final piece outside their sketch book before photographing it and evaluating their success.

Here at Stephen Freeman we encourage pupils to be creative and imaginative within their responses and hope to inspire a love of art that they can use to express their own thoughts, personalities and emotions.
