

Geography.

At Stephen Freeman School we believe in a creative curriculum which offers children the opportunity to study their topics through cross curricular planning and activities. We explore the local area and learn outside the classroom to support the Geography curriculum.

By following the National Curriculum for Geography we aim to:

- Create a sense of identity and an increased understanding of community and the wider world.
- Give pupils a range of skills so they feel confident asking questions and investigating their own ideas.
- Stimulate pupils' interest and curiosity about their surroundings.
- Increase pupils' knowledge and understanding of the changing world.
- Develop pupils' competence in specific geographical skills.
- Give children a sense of responsibility for the world we live in.

Through the cross curricular teaching of Geography we also aim to improve pupils' skills in Literacy, Numeracy and ICT as well as developing their problem solving, reasoning and thinking skills.
