

Science

At Stephen Freeman we want our children to be naturally curious about the world around them and as such, our curriculum has been developed by staff to ensure full coverage of the National Curriculum and to foster a sense of wonder about natural phenomena.

We are committed to providing a stimulating, engaging and challenging learning environment where the children are encouraged to develop a range of enquiring skills including questioning, researching and observing.

We develop the use of scientific language by revisiting topics across different year groups and key stages, and this enables the children to have an expanding vocabulary.
