

Year 2 Home Learning - Summer 1 - Our Planet

Can you turn some plastic, into a piece of ocean themed art?

Create an underwater sea scene showing the impacts of plastic pollution. This could be 2D or 3D.

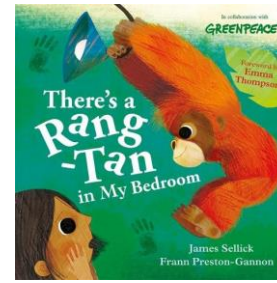

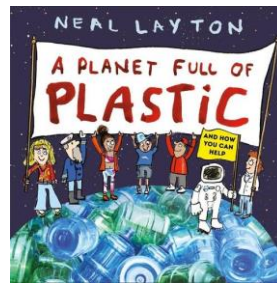

Check your food packaging at home to see if the items can be recycled. Do your best to ensure that you are recycling as much as possible!

Research animals that live in the sea. Create a fact file to share with your class.

Our Planet

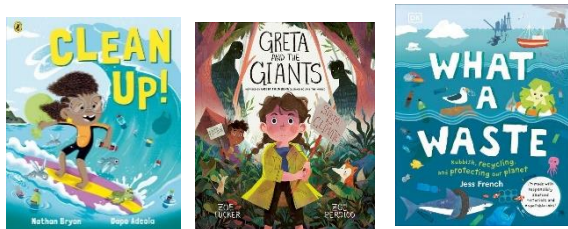

We will become experts on orangutans, can you become an expert on another rainforest animal?

You could also try watching David Attenborough's 'Blue Planet'.

Visit the library to find books about looking after our planet. If you can, bring it in to show the class.

Do some research to find out what food and plants grow in rainforests. Can you find food/products in your home with any of these ingredients?

Use the 'Art Hub for Kids' on YouTube to practise your drawing skills. Focus on sea creatures and rainforest animals, this will help with your art work in school!
