

## Year 1 Home Learning - Term 5 - Enchanted Woodland

Plant some seeds or bulbs at home, take photos and keep a diary of how they are growing.

Practise your 2, 5 and 10 times table.

Make a home for a tiny magical creature. Use a variety of small items such as moss, sticks, pebbles and leaves.

Take your family for a woodland walk, what signs of spring can you find? Choose how to present your information.

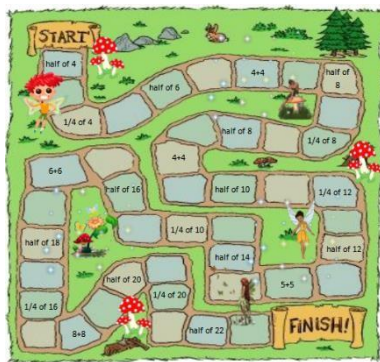

### Enchanted Woodland

Create teeny treats for an imaginary woodland creature. They could be mini pies, crumbles, a gingerbread house or fairy cakes...

Make an Enchanted Woodland maths board game like this one and enjoy playing it with your family. You could bring them into school and play them with your friends

Make a poster or leaflet about your favourite woodland animal using facts. Bring it into school so we can put it on our Home Learning Wall.

Practice doubling and halving of numbers. Can you find quarters too by halving and halving again? You could always start by cutting pizzas and cakes in halves and quarters to share with your family!
